**Getting the garden ready for winter**

At this time of year we need to start thinking about preparing our garden for winter.

We can start by covering plant pots, or moving them into a greenhouse or shed. Rake up leaves and mix them up with grass cuttings in a bin during the winter months, and you will have compost for your flowerbeds in the spring. You will need to plant any tulip bulbs, as well as cutting back dead plants. Other good plants you can think about growing for spring are daffodils so plant plenty of bulbs for a great display of colour.

Put out bird food to help small birds survive through the winter but careful not to put too much out at a time as this could encourage rodents into your garden, although if you have a cat it should help keep them away. Building a log pile will provide a good, warm nest during the cold winter for hedgehogs.

Prune back fruit trees and wrap any surplus apples in newspaper and store them in the shed for later. They should last quite a long time if this is done properly.

You should give your lawn a final cut before the frosty weather starts.

Clean and sharpen your garden tools, rub them with oil to avoid them getting rusty, and store them away in a dry place.

This is also the time to repair broken fences and throw out old pots that you just don't need any more.

Love your garden and your garden will love you back!

**Know the Facts**

Snow has many descriptions. A single snowflake is made of ice crystals and can produce different kinds of snow. Light and fluffy snow is often called 'powder'. This snow is good for skiing but terrible for making snowballs. Sticky snow is good for building snowmen but terrible for skiing. Slush is snow that has a great content of water so is very wet.

Heavy snowfalls are often called 'snowstorms'. Snowstorms with high winds are often called 'blizzards'. We also have a phenomenon called 'thundersnow' which describes a thunderstorm with snow and not rain.

Snow also reflects a high level of ultraviolet rays from the sun and can cause snow blindness. Sunglasses and goggles help absorb the ultraviolet rays.

The highest snowfall ever recorded in one year was 31.1 metres (1224 inches) in Mount Rainier, Washington State, USA, between 19 February, 1971 and 18 February, 1972.

The deepest snow ever recorded in an inhabited area of the UK was near Ruthin in North Wales during the severe winter of 1946-47. A series of cold spells brought large drifts of snow across the UK causing transport problems and fuel shortages. During March 1947 a snow depth of 1.65 metres was recorded.

Every year we look forward to a white Christmas in the UK, but it rarely happens nowadays with most snow falling during January and February.

**The help you give us matters!**

Have you ever wondered what a guide dog does and where your money goes when you sponsor a dog? Guide dogs are highly trained to act as a mobility aid to blind and visually impaired people. It provides not only mobility but gives freedom and independence as well as being a faithful and loving companion. They make great family pets and are extremely loyal.

The confidence of the blind or visually impaired person increases when they have a guide dog because it means they can leave the house and go for a walk or go shopping. Well trained guide dogs are intelligent, alert, and always willing to serve.

**Amongst other things a guide dog is taught to:**

- Walk in a straight line in the center of the pavement unless there is an obstacle.
- Not to turn corners unless told to do so.
- Stop at curbs and wait for the command to cross the road, or turn left or right.
- Deal with traffic.

Matching the correct dog with the correct owner takes skill and experience. The owner's length of stride, height and lifestyle all contribute to the type of guide dog they will be matched with. Amazingly the dogs are taught to judge height and width so that its owner does not bump their head or shoulder or fall over.

**Donations**

Without your donations we would not be able to train as many dogs as we do and we appreciate every penny you give us. Please help to sponsor a dog by contacting [www.guidedogs.uk.com](http://www.guidedogs.uk.com) Thank you!
